    the date you want [100688] .....2

    Unable to Link to Manitou accounts with inactive systems [100700] .....2

## **Application Corrections**

### **Can't load Master Customer page- 500 error [00092063]**

We resolved an issue with opening a master customer.

### **3rd Party Integration — Central Station — Search issues [99220]**

We changed the External Site field so that it will search by Stages sites with their xmit number. Typing in the list box field starts the search. In addition, we updated the label to show the xmit number and name in the display text.

### **Calendar- can't see the whole day once you set filters [99033]**

We changed the height of the Employee dropdown to a maximum of 100px, and it now has scrolling if the list exceeds that maximum height.

### **Managely 5.3.32.5 The date field filters in most all of the custom grid layouts cannot search for a date = the date you want [100688]**

We fixed an issue with the date field filters that was preventing users from searching for a single date.

### **Unable to Link to Manitou accounts with inactive systems [100700]**

We resolved an issue that was not allowing users to link to an active Manitou system if there were inactive systems on that site.
