

# Managely Release Notes

July 2024

Version 5.3.40.10

**MANAGELY**<sup>®</sup>

## **Application Corrections**

### **Error when trying to process payment via Forte in Managely: Value cannot be null [00117040]**

This issue was caused by having multiple Forte accounts (Setup > Utilities > eCheck/Credit card), and trying to add a CC/eCheck on a customer who is using a Forte account that is not the default. (The Forte account can be set on the customer branch).

With this fix, Managely will use the account associated with the customer when adding the CC/eCheck.
