

Managely Release Notes

August 2024

Version 5.3.40.17

MANAGELY[®]

Application Corrections

51543 WO/PO Issue- POs Appearing on 2 different WO [00117378]

When users opened a purchase order it would show one work order number but under the parts a different work order would be shown. We fixed this situation where different work orders were referenced on the same purchase order.
