

Managely Release Notes

October 2024

Version 5.3.41.40

MANAGELY[®]

Application Corrections

New proposals are reverting to 0% sales tax and not refreshing parts when rate manually updated [114728]

We fixed this issue so users can select the sales tax as expected, removed the disabled button for Update Items/Parts under the Sales Tax, and changed the sort order for the sales tax so that it is alphabetized.

Cannot create a new vendor [00123200]

The Default Payment field on the New Vendor screen was a required field. We changed this so that the Default Payment field is no longer required.
