

Managely Release Notes

May 2025

Version 5.3.47.9

MANAGELY[®]

Application Corrections

Unable to invoice certain workorders [00134028]

When users tried to invoice certain work orders, they received these errors:

- Sales Tax Detail's Total Amount doesn't add up to Invoice Detail's Total Amount.
- There was an error while generating the invoice. Please try again or contact support.

This can affect dealers using Avalara. Avalara line items must have a non-negative quantity. We are now accounting for that to resolve these errors.

Unable to Print/Print Preview a Particular Invoice [37725] and Customers are not getting invoices attached to their invoice emails [00137340]

When trying to print or print-preview an invoice, the print was silently failing, and the error logs were showing a divide by zero error. This happened when an invoice work order part had a \$0 rate while trying to calculate the percentage of a progress invoice. Also, invoice PDF files were not attached when emailing customers their invoices. Trying to manually create an invoice failed as well.

We fixed these issues. This change causes the percentage calculation to be bypassed and reported as 100% if the progress invoice is fully invoiced and returns a 0% invoiced and \$0 rate for the part if the progress invoice is partially invoiced.
