

# About Managely

Last Modified on 02/05/2024 5:40 pm EST

Managely is a business management, financial and client management system all wrapped into a single web-based software application. Managely was designed to be the main system you would need to operate your business on a daily basis. Being a web-based application allows you to access your Managely database from anywhere you have internet connectivity.

## **Client Management**

The client management system is designed to allow you to better service your customers. Managely incorporates all the activities necessary to manage your customer base, and give you immediate access to handle all customer inquiries, so you may provide the best customer support possible.

## **Financial Application**

Managely is a complete financial application, from billing to financial statements. As a single software application, all the modules are designed so all financial transactions are immediately posted to the general ledger. There is no need for separate accounting systems.

## **Business Management**

Managely provides your company with the reports and timely information you need to predict trends, understand your business growth, and manage your company's cash flow. To grow your business profitably you need to manage it effectively, and Managely provides the tools with which to achieve this.
