

Add a Site

Last Modified on 03/05/2024 3:22 pm EST

Sites are attached to customer records. To add additional Sites, you must first access the customer record.

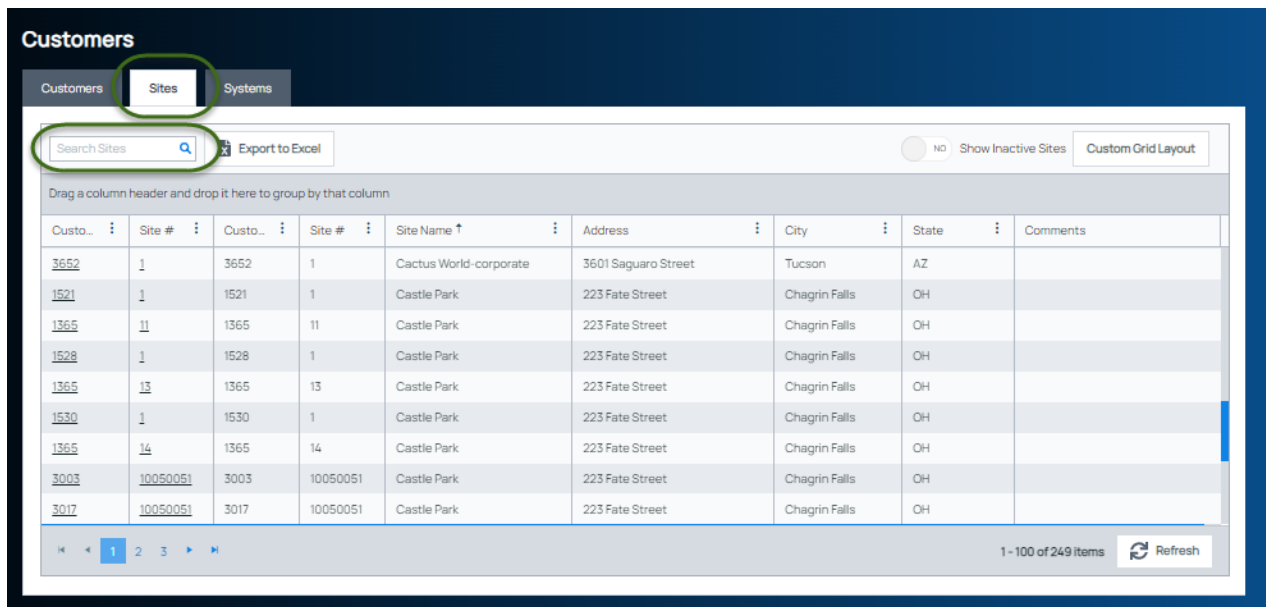

To add an additional site to an existing customer, from the main menu, arrive at the Customers list with this path: Accounts Receivable > Customers.

The Customers list will be displayed. If you know the name of the customer to which the Site is attached, locate the Customer, and then click on the hyperlink in the Customer # column to open the customer record.

If you do not know the customer number or customer name to which the Site is attached, however, you do know the Site Name, click on the Sites tab to search for the customer by Site Name.

Search by Site

At the upper left of the page is a search field. You may type in the first four characters of either the customer number or the Site Name to locate the record faster. Once you have located the Site within the list, click on the hyperlink in the Customer # column to open the customer record.

The screenshot shows the 'Customers' interface with the 'Sites' tab selected. A search field labeled 'Search Sites' is highlighted with a red circle. Below the search field is a table with columns: Custo..., Site #, Custo..., Site #, Site Name ↑, Address, City, State, and Comments. The table contains several rows of data, including customer numbers and site names like 'Cactus World-corporate' and 'Castle Park'. At the bottom right, there is a 'Refresh' button and a page indicator '1 - 100 of 249 items'.
