

Add a Work Order Appointment

Last Modified on 06/23/2026 4:17 pm EDT

Once a work order has been created, appointments may be scheduled with a technician. Create a technician appointment using two methods.

1. [From a work order](#)
2. [From the calendar](#)

A technician appointment may be scheduled from a work order by accessing the work order from a customer record or the Open Work Orders list.

Access the Work Order from the Customer Record

To access a work order from a customer record, from the main menu, navigate to CRM > Customers.

The Customer list opens. Locate the customer in the list, and then click the hyperlink in the Customer # column to open the customer record.

Once the customer record opens, click the Work Orders tab. From the Work Orders tab, locate the desired work order, and then click the hyperlink in the WO # column to open the work order.

Access the Work Order from the Work Orders List

To access a work order from a customer record, from the main menu, navigate to Accounts Receivable > Work Orders.

The Open Work Orders list opens. Locate the desired work order, and then click the hyperlink in the WO # column to open the work order.

Once the work order opens, click the Appointments tab, and then click the **Edit** button at the upper right of the work order detail page.

Data Entry Fields

- **Appointment Time:** Select the date and time for the appointment.
- **Additional Days:** If the technician will be on-site for more than one day, click in the white box to open the calendar to select additional days. The appointment time will be the same as what was selected in the first field (appointment time).
- **All Day:** If the appointment will last all day, set the toggle button to Yes. This schedules an appointment from 8:00 AM to 5:00 PM.
- **Technician:** From the drop-down list, select the technician for the appointment.
- **Select Available Technician:** Click this to choose from a list of available technicians.
- **Additional Technicians:** You can select additional technicians. This is for information purposes only and will not create an appointment.
- **Expected Length (in minutes):** This defaults to the value entered on the Work Order Type setup. This can be changed if necessary.
- **Hourly Labor Rate:** This defaults to the labor rate set up on the Service Level.
- **Work Order Task:**
- **Customer Confirmed:** If this toggle button is set to YES, if there is an email address set up on the customer record, an email will be sent confirming the work order appointment.
- **Dispatch Time:** Enter a dispatch time.
- **Arrival Time:** Enter an arrival time.
- **Completed Time:** Enter a completed time.
- **Length (minutes):** This is automatically calculated.
- **Billable Minutes:** This is automatically calculated.
- **Total Labor Amount:** This is automatically calculated.

Once all entries have been made, click the **Save** button. A confirmation box opens. If you set the Notify Technician button to Yes, and there is an email address set up on the employee record of the technician, an email will be sent to the technician.

Click the **OK** button at the bottom of the confirmation box.

The saved appointment appears in the grid on the work order appointments tab and appears on the calendar.
