

User Manager

Last Modified on 09/16/2024 9:28 pm EDT

The User Manager page has two tabs: Users and Tokens.

The Users page lists existing users in a grid. There are two types of Users: internal users, a company's employees, and customer users. There are switches at the upper right of the page to view inactive users or customer users. By default, the grid shows active internal users.

Each User is assigned a User Role. The User Role determines the permissions available to the user.

User Roles

The matrix below describes each available permission and which ones are defaulted based on the User Role.

When adding a new User, you must select a User Role. The five pre-defined User Roles are Administrator, Manager, User, Technician, and Salesperson. The pre-defined User Roles have pre-configured permissions assigned to each user role. You can set the User Role to "Custom", which allows you to configure the permissions of an individual User.

Miscellaneous
