

Theme Editor

Last Modified on 04/27/2022 1:15 pm EDT

This page shows the current color theme used throughout the application. The color theme applies to all users who log in, unless the users have applied their own theme colors (Setup > Company > User Manager). Use this page to change the color theme or the color of various elements on the pages. Colors are shown by red, green, blue (RGB) value. To see the HEX value, click the down arrow beside the color, and click the double arrows below the color slider. The Sample Controls show a preview of the colors. After making changes, click Save to apply the color changes or click Cancel to revert colors to defaults.

The screenshot displays the 'Theme Editor' interface. On the left is a 'Palette' section with color pickers for Branding Color, Success Color, Warning Color, Error Color, Text Color, Alternate Text Color, and Panel Color. A 'Dark Theme?' toggle is also present. The right side is a 'Theme Preview' section showing 'Buttons' (Sample Button, Primary Button, Highlight Button), 'Edit Controls' (a date input field), and a 'Data Grid'. The data grid contains a table with 7 rows of contact information.

	Contact Name	Job Title	Status	Phone	Address
