

Tags Overview

Last Modified on 08/23/2022 4:28 pm EDT

Tags are available for use when creating a task related to a customer or a sales lead within a proposal. Tags allow you to create a Task and assign to a user for an action that needs to be taken.

Each Tag may be assigned for use with a Task or a Lead, so you may have very different tags depending on where it will be used - an employee task for a customer or a lead task.
