

Customer Management Overview

Last Modified on 04/17/2022 10:45 pm EDT

The revenues generated by Customers are typically a company's main source of income. Having access to customer records and understanding the information provided within a customer record, will provide the users the appropriate data source to answer customer inquiries.

Customer Management is a sub-set of Accounts Receivable. Many functions are used by clerical and management level users, and each option within this module is secured by user permissions.
