

# Edit Parts Within a Part Kit

Last Modified on 04/27/2022 10:52 am EDT

Users may edit the Parts contained within a Part Kit.

To edit a Part within a Part Kit, navigate to Setup > Items & Parts > Part Kits.

The Part Kits listing will be displayed. Locate the Part Kit, and click the “+” sign to the left. This will display all the parts included in the Part Kit.

The only thing that may be edited on a part within the Part Kit is the quantity. Locate the part where the quantity needs to be edited, and then click the Edit button to the right of the part.

The screenshot shows the 'Part Kits' interface. At the top, there are buttons for '+ Add Part Kit' and 'Export to Excel', and a toggle for 'Show inactive part kits'. Below this is a table listing Part Kits with columns for Part Kit Code, Description, Total Parts, and Default Rate. Each row has 'Edit', 'Delete', and 'Parts' buttons. The 'Vista128FBP-Kit' is expanded to show a detailed table of parts with columns for Part Code, Description, and Quantity. The 'Edit' button for the 'Wireless Pet Immune Motion' part (Part Code 5890) is circled in green.

Part Kit Code	Description	Total Parts	Default Rate

6160	Keypad	1	Edit Delete
7940WH	Universal contact	2	Edit Delete
Vista128FBP	Fire/Burg Control Panel	1	Edit Delete

The Part Kit Part Edit form will be displayed. Update to the desired quantity, and then click on the Save button when finished.

The 'Part Kit Part Edit' form is a small dialog box with a title bar and a close button. It contains a 'Quantity' label followed by a text input field with a spinner control. Below the input field are two buttons: 'Save' (green) and 'Cancel' (white).
