

Add a Warranty Type

Last Modified on 03/04/2025 4:59 pm EST

To add a new Warranty Type, from the main menu, arrive at the Warranty Types setup with this path: Setup > Operations > Warranty Types.

The Warranty Types list opens. Click the **Add Warranty Type** button at the upper left of the grid.

The Edit Warranty Type form opens. There are two data entry fields on this form, and both fields are required.

- **Name:** Type in a description for the warranty code. Maximum of 25 characters.
- **Warranty Length:** Type in the number of days for the warranty code.

When finished, click the **Save** button at the bottom of the form.
