

Delete a Warranty Type

Last Modified on 03/04/2025 5:01 pm EST

To delete a Warranty Type, from the main menu, arrive at the Warranty Types setup with this path: Setup > Operations > Warranty Types.

The Warranty Types list opens. Locate the Warranty Type you want to delete, and then click the **Delete** button.

Note: When you click Yes to delete a record, this does not delete the value from the database; Managely marks the record as “Inactive”. In most cases, if a setup value was previously marked as “deleted”, you can re-activate the deleted [inactivated] record. When selecting to view Inactive Only records, items that were previously “deleted”, will appear in the inactive list.

A confirmation message opens. Click the Yes button to delete the record.
