

Delete a Warranty Type

Last Modified on 04/27/2022 3:30 pm EDT

To delete a Warranty Type, from the main menu, arrive at the Warranty Types setup with this path: Setup > Operations > Warranty Types.

The Warranty Types list will be displayed. Locate the Warranty Type you want to delete, and then click on the Delete button.

Note: When the User selects Yes to accept the deletion of the record, this does not delete the value from the database, however marks the record as "Inactive". In most cases, if a setup value was previously marked as "deleted", a user is able to re-activate the deleted [inactivated] record. When selecting to view Inactive Only records, items that were previously "deleted", will appear in the inactive list.

The screenshot shows a table titled "Warranty Types" with the following data:

Name	Length (in days, -1 is Lifetime)	Edit	Delete
1 Year Parts & Labor	365	Edit	Delete
30 Day	30	Edit	Delete
90 Day Parts Only	0	Edit	Delete
90 Day Labor Only	90	Edit	Delete
90 Day Parts & Labor	90	Edit	Delete
Lifetime	999999	Edit	Delete
None	0	Edit	Delete

The "Delete" button for the first row is circled in green. The interface also includes a "+ Add Warranty type" button, a "Show inactive warranty types" toggle, and a footer with "1 - 7 of 7 items" and a "Refresh" button.

A confirmation message will be displayed. Click the Yes button to proceed with the deletion (inactivation) of the record.
