

Service Levels Overview

Last Modified on 11/07/2023 2:05 pm EST

Every System record is assigned a Service Level. When a Work Order is created, the software looks at the system's warranty type and the warranty start date. If the system is still within the warranty period, then by default, no charges will be calculated. If the system is out of warranty, the software looks at the Service Level assigned to the system to calculate billable charges.
