

Delete a Service Level

Last Modified on 03/04/2025 5:07 pm EST

To delete a Service Level, from the main menu, arrive at the Service Levels setup with this path: Setup > Operations > Service Levels.

The Service Levels list opens. Locate the Service Level you want to delete, and then click the **Delete** button.

Note: When you click Yes to delete a record, this does not delete the value from the database; Managely marks the record as “Inactive”. In some cases, if a setup value was previously marked as “deleted”, you can re-activate the deleted [inactivated] record. When selecting to view Inactive Only records, items that were previously “deleted”, will appear in the inactive list.

Service Levels

+ Add Service Level NO Show Inactive Service Levels

Service Level Code	Description	Invoice Parts	Invoice Labor
