

Delete a Part

Last Modified on 04/27/2022 4:23 pm EDT

To delete a Part, from the main menu, arrive at the Item Parts setup with this path: Setup > Items & Parts > Parts.

The Parts list will be displayed. Locate the Part you want to delete, and then click on the Delete button (trash can icon).

Note: When the User selects Yes to accept the deletion of the record, this does not delete the value from the database, however marks the record as “Inactive”. In most cases, if a record was previously marked as “deleted”, a user is able to re-activate the deleted [inactivated] record. When selecting to view Inactive Only records, items that were previously “deleted”, will appear in the inactive list.

PartCode	Description	Rate	Cost	GL	
DSC-G525ANTQ	DSC 25" Cell Antenna	\$95.70	\$45.00	42001 - Service - Parts	Edit Delete
