

Editing Work Order Parts

Last Modified on 10/28/2024 5:19 pm EDT

When editing work order parts, you can edit the **Is Stock?** and **Warehouse** fields on work order parts even if the work order is locked (such as when using progress invoicing). (All other fields are still disabled and cannot be changed.)

The screenshot shows a dialog box titled "Edit Work Order Part : Fire Alarm Part". The form contains the following fields and values:

- Part Description: test fire alarm part
- Zone: (empty dropdown)
- Location: (empty text field)
- Is Stock?: YES (radio button selected)
- Warehouse: TestWarehouse (dropdown menu)
- Sales Tax Code: None (dropdown menu)
- Taxable?: NO (radio button selected)
- Quantity: 1 (spin box)
- Is Commissionable?: NO (radio button selected)
- Rate: \$85.00 (spin box)
- Labor Units: 0 (spin box)

Summary table:

Commission Amount	\$0.00
Amount	\$85.00
Total Labor	0
Part Cost	\$15.00
Total Cost	\$15.00

Buttons: OK, Cancel

All work order parts coming from a completed proposal will default to Stock? = YES and use the default warehouse set on the Preferences page (Setup > Company > Preferences > Inventory tab > Main Warehouse field).

The Parts Issue screen (from work order parts issue) will only display stocked parts; non-stocked parts are filtered out automatically.
