

Percentage Being Billed Shown for Items and Parts in Progress Invoicing

Last Modified on 03/28/2025 4:45 pm EDT

Customers receiving progress invoices (Accounts Receivable > Invoices) will see a percentage being billed for each item and part on the invoices. This helps them see what portion of each item or part is being billed compared to the total amount.

There is a new column called "Percentage Being Billed" on invoice. This column appears only when progress invoicing is applied. The column is placed next to the Quantity and Rate columns for clear readability. Qty (quantity) and Rate show as the full amount and the total reflects the percentage being billed.

Description	QTY	Rate	Percentage Being Billed	Amount
Bucky Barns, 8401 Chagrin Rd, OH				
Service Fee	1.00	≈50.00	1.8671 %	≈0.93

To see this column, be sure the template used for the invoice has the Percentage Being Billed added.
