

Part Pricing Level

Last Modified on 05/27/2025 1:02 pm EDT

Use this when you have a special part pricing for a specific customer.

1. Create a level with special part pricing
 - This is different from the default rates added under parts
2. When adding a new customer, add that particular part pricing level
3. Whenever a part is added to a work order, the customer will be charged the part's pricing rate
