

# Sedona-X Mobile Release Notes

August 2024

Version 1.6.18

## **Application Corrections**

### **Managely/Sedona-X Mobile**

#### **Sedona-X mobile doesn't assign warehouses to parts added through the app [00111278]**

When parts were added through the app, the app was not assigning warehouses to the part. We added warehouse input for work order parts in edit mode. The app now follows this flow: find the part in the parts list; add the part and close the parts list; select the wanted warehouse from the added parts list.

#### **App randomly crashes [00111261]**

We fixed an issue where an error was disrupting users from staying signed in as expected.

#### **Labor Rate set to 0.00 when updates made on appointment widget [00112715]**

We fixed the labor rate not being pulled down for the appointment widget on the work order editor.

## **Special Upgrade/Install Instructions**

**Operating System** — iOS devices should be on iOS version 17 and Android devices should be using Android 14 for full compatibility, although earlier versions may be able to support the application. Please check the app store for any updates to your Sedona-X Mobile app.

**SedonaOffice** — SedonaOffice will need to meet the system minimum (below) to support Sedona-X Mobile.

**SedonaWeb/SedonaAPI 2.0** — IT will need to update your SedonaWeb/SedonaAPI 2.0 version to meet the system minimum (below) at the same time as your SedonaOffice version. This is to ensure compatibility with the Sedona-X Mobile app.

## **(SedonaOffice) Supported Environments**

### **Minimum System Requirements**

- SedonaOffice Version 6.2.0.16
- SedonaWeb/SedonaAPI 2.0 Version 1.46.0
- Server (where SedonaWeb/SedonaAPI 2.0 is installed) has Microsoft .NET 4.8 installed
